Many retirement communities have declined to name names during the pandemic. So she started a newsletter to do just that.

[The Lizzie Borden Ax Murder House Has Hit the Market](#)

It looks like a quaint New England home from the outside, but the house where Lizzie Borden's family was murdered is one of the most notorious private residences in the country. Now, it can be yours for [\\$2 million](#).

[Italian Artist Transforms Old and Forgotten Trees Into Incredible Works of Art](#)

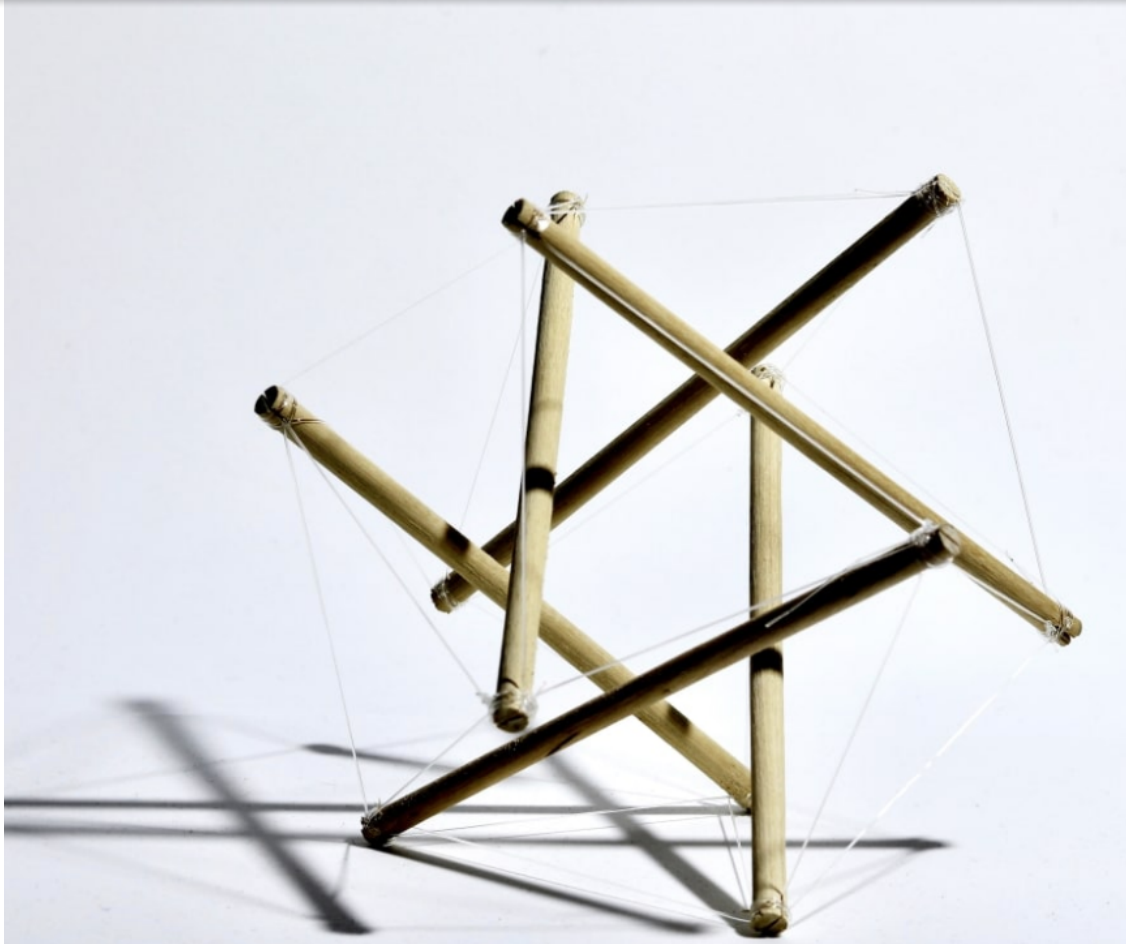

Italian artist [Giuseppe Penone](#) has been exploring the relationship between people and nature for decades with his thought-provoking sculptures and [installation art](#). Oftentimes, this means merging parts of himself into organic objects—like trees—to portray the connection. “Tactile experience and physical contact give the true dimension of things,” Penone [wrote in 1968](#). “Not having a direct relationship with the material, but only a concept, or an idea of making a work to match an image conceived in the mind, isn’t fertile over time—it doesn’t produce many things.”

[The CIA's Entire Collection of Declassified UFO Documents Is Now Available to Download](#)

This month, it came to light that the latest [coronavirus](#) relief bill [contains](#) a provision requiring U.S. intelligence agencies to report everything they know about UFOs. They have 180 days to do it, and they're allowed to keep some of the information classified. Fortunately, there's plenty of other UFO-related material to peruse while you wait.

8 Incredible Structures Around the World That Use Tensegrity to Defy Gravity

Think back to your high school physics class. You may remember drawing force diagrams with arrows signifying gravity and some outside variables. The arrows were probably forces that work in compression. The ancient pyramids are a classic example of this form of building. By creating a larger base and stacking taller and taller, a structure can be created. **Tensegrity** is precisely the opposite—rather than focusing on a heavy foundation, tensegrity structures work through tension.
